2 277 volts

Metal Halide

The reflector for our metal halide fixtures is finished with a highly reflective white powdercoat finish, which is also easy to maintain.

Ballasts are encased and potted, thermally protected with dual taps for 120 or 277 volts. Usually the ballast is mounted in a remote location. In the event this is not possible, the ballast may be mounted in specially designed, decorative traditional or contemporary canopies appropriate to the fixture style.
